

GLOD

Marcin Glod, born 1994 in Krakow, lives and works in Vienna. Initially pursued a successful career as a graphic designer and creative director. His works are located at the intersection of street art, graffiti and painting. This field of tension is his source of inspiration and enables him to create a very broad spectrum of work.

With his work Glod tries to reflect various art directions in a new complete work. He focuses on sustainability and reuse of vintage elements. The pop cultural references are an important tool for him to deal with social developments, current events and also historical parallels.
